

AMIT WIZEL

Software Engineer | Full-Stack & AI Solutions 054-6449492 | amitvvv@gmail.com | [linkedin](#) | Tel Aviv, Israel

PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate and Full-Stack Software Engineer specialized in building AI-driven SaaS platforms and scalable cloud architectures. Deeply focused on Agentic Workflows, RAG implementations, and complex backend integrations.

Leveraging a strong academic foundation and hands-on experience to bridge the gap between robust infrastructure, cybersecurity, and modern AI solutions.

TECHNICAL SKILLS

- **Languages:** Python, Node.js (JavaScript/TypeScript), C++, Java, Solidity, SQL, PowerShell.
- **AI & GenAI:** Agentic RAG, OpenAI **Function Calling**, Prompt Engineering, LLM Workflows, Vector Databases.
- **Backend & Cloud:** AWS (S3, Lambda, API Gateway), Docker, Git, Microservices Architecture, NestJS.
- **Web & Frameworks:** React.js, Express.js, Next.js, REST APIs, GraphQL.
- **Databases:** MongoDB (Atlas), PostgreSQL, Prisma ORM, Mongoose.
- **Security:** JWT, **Role-Based Access Control (RBAC)**, Smart Contract Security, TLS.

WORK EXPERIENCE

Independent Software Developer | Freelance | 2025 – Present

- Consulting for businesses to automate workflows and optimize digital presence using AI and Custom Software Solutions.
- **AI Implementation:** Architected autonomous AI agents using System Instructions and Skills to automate data categorization and task execution.
- **Full-Stack Development:** Built responsive web applications using React.js and Node.js, integrated with MongoDB and cloud services.
- **Cloud Operations:** Managed deployment processes using Docker and AWS (S3/Lambda) to ensure scalable performance.

IBM – SOC/NOC Analyst | 2019 – 2025

- Manage complex cybersecurity incidents and conduct full investigations in high-security environments.
- **Automation & Scripting:** Developed **Python and PowerShell scripts** to automate log analysis and incident response playbooks, improving team efficiency.
- Utilize advanced SIEM and monitoring tools (QRadar, Splunk) to maintain system integrity and network performance.

IDF – Technology Unit Commander | 2013 – 2016

- **Outstanding Soldier Award (2016).**
- Led real-time IT operations and managed technical support teams for mission-critical system maintenance.
- Managed network infrastructure, Active Directory, and SCCM remote deployments.

EDUCATION

- Bachelor of Science: Computer Science Holon Institute of Technology - HIT 2021-2025

SELECTED PROJECTS

ShopAi | AI SaaS Sales Agent for Shopify

- **Architecture:** Architected a system enabling real-time synchronization between LLMs and Shopify API for autonomous sales and inventory checks.
- **Function Calling:** Implemented complex Function Calling workflows to execute active cart operations (Add-to-Cart, Checkout, **Search Items**) directly via WhatsApp interface.
- **Prompt Engine:** Developed a Multi-tenant Prompt Engine, allowing distinct brand personas and business logic injection per store without code changes.
- **Backend:** Engineered a scalable Serverless Backend (Node.js/AWS Lambda) handling high-concurrency webhooks and state management.
- **Tech Stack:** TypeScript, Node.js, Next.js, PostgreSQL, Prisma ORM, OpenAI API, AWS Lambda, Shopify Admin API.
-

CareChain – Blockchain-Powered Secure Medical System | Full-Stack Developer

- **Award:** Recognized as an Outstanding Final Project for technical complexity and innovation.
- **Development:** Designed a secure platform for medical record management using Node.js, React, and Solidity Smart Contracts.
- **Security:** Implemented Role-Based Access Control (RBAC) and digital certificate-based login using JWT and TLS.
- **Deployment:** Deployed on Ubuntu using Apache Reverse Proxy and Docker for environment consistency.
